Summary

Python Full-Stack Developer currently building MedRoute, a field management dashboard for medical representatives, at Priacc Innovations. Hands-on experience across the stack with Django and Django REST Framework — from relational data modeling and REST API design to front-end dashboard views, JWT-secured authentication, and cloud deployment — backed by a full-stack internship and multiple end-to-end personal projects, with a focus on clean, maintainable code and reliable delivery in team environments.

Experience

Python Developer
Priacc Innovations Pvt Ltd · Hybrid · Full-time

Jul 2025 – Present

- Working as a full-stack developer building healthcare and field-operations products, including MedRoute (a field management dashboard for medical representatives) and DischargeMD (an AI-powered medical discharge summary assistant).
- Owning features end-to-end across both products — from Django REST API and relational schema design to front-end dashboard views — and collaborating with the team through to public launch.

Tech Stack: Python, Django, Django REST Framework, React, Firebase, SQL Database.

Python Developer Intern
ADVI Group of Companies · Hyderabad, India · Internship

Jan 2025 – Mar 2025

- Worked on Python-based automation and full-stack development projects within an agile team, contributing across backend logic, API integration, and testing.
- Collaborated with senior developers to debug, test, and refine application features before deployment, following code review and QA practices.
- Strengthened full-stack development fundamentals along with problem-solving, teamwork, and communication skills in a fast-paced product environment.

Tech Stack: Python, Django, REST APIs, Git, Agile workflow.

Projects

1 - MedRoute — Field Management Dashboard (Priacc Innovations)

- Full-stack field management dashboard for medical representatives, replacing manual, paper-based tracking with doctor/contact management, route planning, and visit note logging.
- Built an auto-generated daily route and activity plan and an analytics view summarizing rep performance, with the relational schema and REST APIs backing doctor and visit data on a SQL database.
- Shipped to a public launch with a 14-day free trial for pharma field teams.

Tech Stack: Django, Django REST Framework, SQL Database, REST APIs.

2 - DischargeMD — AI-Powered Medical Discharge Assistant (Priacc Innovations)

- Full-stack contributor on a healthcare app that turns patient data into structured discharge summaries using Google Gemini AI, with Firebase handling authentication and data storage.
- Worked across the React (Vite) dashboard UI and the Firebase-backed data layer, plus PDF export of generated summaries for record-keeping and sharing.
- Contributed to consolidating environment/config management into a single setup and to migrating the frontend from German to English for broader accessibility.

Tech Stack: React (Vite), Firebase (Auth, Firestore, Hosting), Google Gemini AI, jsPDF.

3 - Appointment Booking System — Full-Stack Web App

- Built a full-stack appointment booking platform with a custom admin dashboard for reviewing, approving, and rejecting appointments, including filters and pagination.
- Implemented JWT-based authentication (access & refresh tokens) with a custom email-based user model for secure login, and designed CRUD REST APIs backed by PostgreSQL.
- Deployed backend and frontend separately on Render with a scalable, production-style REST architecture connecting the dashboard to backend data in real time.

Tech Stack: Django, Django REST Framework, PostgreSQL, JavaScript, Render.

4 - Online Book Store — Django Full-Stack Web App

- Built a full-stack online bookstore covering browsing, search, cart, checkout, and order management, structured into modular Django apps for maintainable, reusable code.
- Designed a RESTful backend for CRUD operations on books, users, and orders, with a responsive, mobile-friendly Bootstrap UI.

Tech Stack: Python, Django, SQLite3, Bootstrap.

Skills

Languages & Frameworks (• Python • Django • Django REST Framework • JavaScript • React.js • HTML • CSS • Bootstrap)

Databases (• PostgreSQL • MySQL • SQLite)

Tools & Platforms (• Git • GitHub • Postman • Render • Vercel • Firebase • MS Office)

AI & Cloud (• Google Gemini AI • Firebase Auth & Firestore)

Core Competencies (• REST API Design • JWT Authentication • Database & ORM Design • Object-Oriented Programming • Responsive UI Development • Cloud Deployment • Debugging & Problem-Solving)

Education

B.E., Computer Science & Engineering
Higher Secondary (PUC)
SSLC

KBN University, Kalaburagi · 2022 – 2025
Syed Barey PU College of Science, Kalaburagi · 2020
The City Academy, Kalaburagi · 2018
